10mm, 14mm & 22mm deep socket

10mm wrench

Flat head screw driver or plastic trim removal tool

Loctite (optional)

1. With a flat head screw driver or plastic trim removal tool, carefully remove the tow hook cover from the front bumper.

2. Using a 22mm socket begin threading the aluminum hex bolt in to the bumper. Then using a torque wrench, tighten to 45ft/lbs or 540 in/lbs.
  - If it's difficult to thread the aluminum hex bolt in to the bumper, stop. Use the OEM tow hook and some WD40 or PB Blaster to clean the threads.

3. Place the external tooth lock washer on to the 14mm bolt provided with your kit.
4. Slip the bolt through the Toe Tag mounting bracket and add the spacer also included with your kit as illustrated below.

5. Add a couple of drops of Loctite to the threads of the bolt and attach the Toe Tag mounting bracket to the aluminum hex bolt.
  - If you're parked on a level surface you may use a level across the top two ears of the bracket.
6. Tighten and torque the bolt using a 14mm socket and torque wrench to 145in/lbs or 13ft/lbs.
  - Do not exceed 145in/lbs or 13ft/lbs or the hex bolt will be damaged.

7. Using a 10mm socket and 10mm socket wrench, attach your license plate to the Toe Tag using the 4-10mm bolts, 8-flat washers and 4-10mm nyloc nuts.
